PRESS RELEASE
(Internal Use Only)

DODSAL Selects Marconi Solution for TAKREER Inter Refineries Pipeline Project

DODSAL Pte Limited, an engineering, procurement and construction multinational with its corporate headquarters in Dubai, UAE has selected WWW.NETWORKS as the telecommunications sub-contractor for the Inter Refineries Pipeline Project (IRRP) in Abu Dhabi.

The IRRP is a pipeline project linking the Abu Dhabi refinery to the Ruwais Refinery which will optimise the inter-refineries operations between the two refineries and will eliminate shipment of oil products by sea. It will also address the increased product requirements at Abu Dhabi International Airport and Al Ain.

The project completion is expected by first quarter 2007 and the scope of work includes state-of-art instrumentation and control, telecom, supervisory control systems, storage facilities and pipelines that will be in line with the best available technology in the world.

The communication system awarded to WWW.NETWORKS involves the Design, Engineering, Supply, System Integration, Installation and Commissioning of Marconi (now Ericsson) SDH equipment and Cisco Call Manager providing Voice Over IP. The communication system will be used to transmit SCADA and voice signals for pipe line control.

The Marconi OMS 1200 STM-1/4 SDH equipment will carry the voice over IP traffic over an Ethernet interface in both point to point and point to multipoint configurations. A Cesium based synchronization clock will ensure that timing is maintained at an extremely accurate level.

Notes

About TAKREER

The Abu Dhabi Oil Refining Company (TAKREER) was established in 1999 as a public joint-stock company to take over the responsibility of refining operations previously undertaken by the Abu Dhabi National Oil Company (ADNOC). The company's areas of operation include the refining of crude oil and condensate, supply of petroleum products and production of granulated sulphur in compliance with domestic and international specifications.

TAKREER is responsible for developing the refining industry, which started with the establishment of the Abu Dhabi Refinery in 1976 and the Ruwais Refinery in 1982. The company is also in charge of implementing national strategies aimed at enhancing the role of downstream industries in the local economy.
